PROFESSIONAL SUMMARY

Results-driven **Senior Frontend Engineer** with 5 years of experience building high-throughput, enterprise web applications serving up to 30M+ active users at PhonePe and OLA. Expert in React, Next.js, TypeScript, Redux Toolkit, and modern Frontend Architecture. Proven track record of optimizing Core Web Vitals, architecting design systems, integrating AI-assisted workflows, and instituting automated CI/CD testing infrastructure to maximize developer velocity and system reliability.

TECHNICAL SKILLS

Languages & Core:	JavaScript (ES6+), TypeScript, HTML5, CSS3, Web Accessibility (WCAG)
Frontend Frameworks & State:	React.js, Next.js, Redux Toolkit, Ant Design (AntD), Tailwind CSS, Micro-frontends, Core Web Vitals
Backend & Infrastructure:	Node.js, RESTful APIs, WebSockets, Webpack, Vite, CI/CD (GitLab)
Testing & Telemetry:	Jest, Playwright, Cypress, New Relic, Sentry
Architecture & Workflows:	Design Systems, Tree-Structured UI, State Normalization, Performance Optimization, AI Workflows (GitHub Copilot)

PROFESSIONAL EXPERIENCE

Software Engineer <i>PhonePe</i>	Mar 2024 – Present <i>Bengaluru, India</i>
• Design System Migration: Architected and led the migration of core merchant dashboard (serving 5M+ active merchants) from Material-UI to an in-house UI library based on Ant Design (AntD), cutting component setup time by 25% and standardizing design tokens across teams. • Frontend Architecture & Rendering: Engineered Service-Mesh, an interactive dependency visualization platform mapping 100+ microservices; implemented tree-structured UI rendering to cut Mean Time to Resolution (MTTR) by 30% for 200+ engineers. • Performance Engineering: Optimized Core Web Vitals & runtime performance across 12+ high-traffic modules by modularizing global Redux state slices and using New Relic telemetry to eliminate redundant layout re-renders. • Observability & Monitoring: Designed an enterprise Alert Management Console tracking 500+ threshold metrics; integrated Sentry exception tracking to orchestrate real-time error notifications across 50+ channels with zero missed critical alerts. • Developer Velocity & CI/CD: Integrated AI-assisted development workflows (GitHub Copilot/LLMs) into feature delivery while establishing CI/CD quality gates with 1,200+ automated Jest/Playwright tests to accelerate sprint velocity.	
Software Development Engineer <i>OLA</i>	Dec 2021 – Feb 2024 <i>Bengaluru, India</i>
• Product Overhaul & CSAT: Overhauled UI/UX architecture of core Driver Onboarding Platform across 100+ cities using React and modular view containers, slashing onboarding cycle time by 20% and driving a 15% increase in CSAT. • Real-time Telemetry: Scaled Next.js EV Fleet Command Center monitoring 50K+ active vehicles, implementing WebSockets for real-time telemetry streaming and rendering interactive geospatial analytical panels. • Infrastructure Cost Optimization: Spearheaded platform migration from Google Maps API to proprietary Ola Maps SDK across consumer web applications (30M+ active users), directly cutting mapping infrastructure costs by 25%. • Geospatial Engineering: Developed multi-layered Time-Geo-Fence module handling 2M+ daily location pings with sub-second polygon map primitive overlays and dynamic location-based access controls.	

EDUCATION

Bachelor of Engineering (B.E.) in Mechanical Engineering <i>The National Institute of Engineering</i>	Aug 2016 – Oct 2020 <i>Mysuru, India</i>
Certification in Full Stack Web Development <i>Masai School</i>	Mar 2021 – Nov 2021 <i>Online</i>
